Performance data quoted represents past performance. Past performance is no guarantee of future results so that shares, when redeemed, may be worth more or less than their original cost. The investment return and principal value will fluctuate. Current performance may be higher or lower than the performance quoted. For current month-end performance call 1-866-759-5679 or visit www.alpsfunds.com. Performance includes reinvested distributions and capital gains.

Maximum Offering Price (MOP) performance for Class A shares includes the Fund's maximum sales charge of 3.25%.

Contingent Deferred Sales Charge (CDSC) performance for Class C shares includes a 1% CDSC on shares redeemed within 12-months of purchase. Performance shown at Net Asset Value (NAV) does not include these sales charges and would have been lower had it been taken into account.

Important Disclosures & Definitions

An investor should consider the investment objectives, risks, charges and expenses carefully before investing. This material must be preceded or accompanied by the prospectus. Read the prospectus carefully before investing.

Performance data quoted represents past performance. Past performance is no guarantee of future results; current performance may be higher or lower than performance quoted. All investments are subject to risks, including the loss of money and the possible loss of the entire principal amount invested. Additional information regarding the risks of this investment is available in the prospectus.

Effective 10/4/2024, the ALPS | Smith Balanced Opportunity Fund changed its name to the ALPS Balanced Opportunity Fund. Additionally, Smith Capital Investors, LLC ceased to serve as sub-advisor to the Fund and ALPS Advisors, Inc., the Fund's investment adviser, assumed all responsibility for selecting the Fund's investments.

A rise in interest rates typically causes bond prices to fall. The longer the duration of the bonds held by a fund, the more sensitive it will likely be to interest rate fluctuations.

The Fund intends to gain fixed income exposure through investments in affiliated exchange-traded funds (ETFs), primarily the ALPS | Smith Core Plus Bond ETF. The Adviser has agreed to waive and/or reimburse the Fund for any acquired fund fees and expenses payable by the Fund that are attributable to the portion of the Fund's assets invested in an affiliated ETF. Each ETF in which the Fund invests will be subject to its own principal risks. Those ETF risks may in turn become principal risks of an investment in the Fund. ETFs are investment companies that are bought and sold on a securities exchange. The Fund could lose money by investing in an ETF. Overall securities market risks may affect the value of individual instruments in which the Fund or an Underlying ETF invests. When the value of the Fund's investments goes down, your investment in the Fund decreases in value and you could lose money.

30-Day SEC Yield: reflects the dividends and interest earned during the period, after the deduction of the Fund's expenses.

30-Day SEC Yield (Unsubsidized): reflects the dividends and interest earned during the period, after the deduction of the Fund's expenses, excluding fee waivers.

Alpha: a measure of performance on a risk-adjusted basis; often considered the active return on an investment, the ratio gauges the performance of an investment against a market index used as a benchmark.

Beta: a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market or a benchmark.

Bloomberg US 1000 Index: a float market-cap-weighted benchmark of the 1000 most highly capitalized US companies.

Bloomberg US Aggregate Bond Index: a broad-based benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, fixed-rate agency MBS, ABS and CMBS (agency and non-agency).

Down Capture: a statistical measure of an investment manager's relative performance during bear (down) markets.

R-squared: the percentage of a fund or security's movements that can be explained by movements in a benchmark index.

Sharpe Ratio: a measure that indicates the average return minus the risk-free return divided by the standard deviation of return on an investment.

Standard Deviation: a statistical measure that indicates the extent of deviation for a group as a whole.

Trailing Twelve Month Yield: refers to the percentage of income a portfolio has returned to investors over the last 12 months. Past performance is no guarantee of future results.

Up Capture: a statistical measure of an investment manager's relative performance during bull (up) markets.
