

ALPS Global Opportunity Fund

Fact Sheet | December 31, 2023

Unconstrained Capital Allocation

- The ALPS Global Opportunity Fund is an open-end mutual fund that provides investors access to global companies which we believe to have a superior and more flexible capital allocation process with the ability to provide consistently high returns on invested capital. We believe companies that have consistently high returns on invested capital can provide attractive stock price appreciation and risk-adjusted returns.
- Most public companies have limited degrees of freedom to deploy capital and enhance their operations. Over time, they face significant constraints to growth as products and markets mature, competition increases and innovation and technological disruption decreases operating margins and diminishes returns on invested capital.
- The investment team has identified global companies with broad latitude and flexibility in their capital allocation process, with the ability to more broadly deploy capital over longer investment cycles.

Performance data quoted represents past performance. Past performance is no guarantee of future results; current performance may be higher or lower than performance quoted.

All investments are subject to risks, including the loss of money and the possible loss of the entire principal amount invested. Additional information regarding the risks of this investment is available in the prospectus.

Effective January 24, 2023, the ALPS | Red Rocks Global Opportunity Fund changed its name to the ALPS Global Opportunity Fund.

Certain of the Fund's investments may be exposed to liquidity risk due to low trading volume, lack of a market maker or legal restrictions limiting the ability of the Fund to sell particular securities at an advantageous price and/or time. As a result these securities may be more difficult to value. Foreign investing involves special risks such as currency fluctuations and political uncertainty. The Fund invests in derivatives and is subject to the risk that the value of those derivative investments will fall because of pricing difficulties or lack of correlation with the underlying investment.

There are inherent risks in investing in private equity companies, which encompass financial institutions or vehicles whose principal business is to invest in and lend capital to privately-held companies. Generally, little public information exists for private and thinly traded companies, and there is a risk that investors may not be able to make a fully informed investment decision.

Listed Private Equity Companies may have relatively concentrated investment portfolios, consisting of a relatively small number of holdings. A consequence of this limited number of investments is that the aggregate returns realized may be adversely impacted by the poor performance of a small number of investments, or even a single investment, particularly if a company experiences the need to write down the value of an investment.

ALPS Advisors, Inc., registered investment adviser with the SEC, is the investment adviser to the Fund. ALPS Advisors, Inc. is affiliated with ALPS Portfolio Solutions Distributor, Inc.
