

ALPS Global Travel Beneficiaries ETF

Fact Sheet | September 30, 2023

Why Global Travel Beneficiaries?

In addition to traditional travel-related businesses, JRNY's artificial intelligence-driven screening process identifies additional companies that may benefit from the global travel ecosystem. We believe the inclusion of beneficiaries in JRNY's portfolio may provide a holistic and more diversified exposure to the secular tailwinds in global travel.

Why Invest in the ALPS Global Travel Beneficiaries ETF?

JRNY may enhance a core equity position by potentially providing benefits to investors:

- **Holistic and diversified exposure** – access to a broad global travel ecosystem, rather than individual segments, with the potential to temper cyclicality
- **Quality and growth overlay** – following the initial segment screen, companies receive a relative ranking by quality and growth which factors position size in the portfolio
- **Artificial intelligence-assisted screening**[†] – Index methodology leverages artificial intelligence (AI) technology to identify travel beneficiary companies that may derive revenue and growth from the global travel economy
- **ETF structure** – a fully transparent*, passively managed strategy in a low-cost**, tax-efficient*** fund structure

² S-Network Global Travel Index: a rules-based methodology developed by S-Network Global Indexes Inc., which is designed to identify exchange-traded stocks of companies that are materially engaged in the global travel industry, including four segments: Airlines & Airport Services; Hotels, Casinos, Cruise Lines; Booking & Rental Agencies; and Ancillary Beneficiaries, which is based on the research of the Index Provider. One may not invest directly in an index.

Investment Objective

The Fund seeks investment results that replicate as closely as possible, before fees and expenses, the performance of the S-Network Global Travel Index (TRAVEL).

Investment Philosophy

JRNY invests in companies principally engaged in, or deriving significant revenue from, the global travel industry, including four segments: Booking & Rental Agencies, Airlines & Airport Services, Hotels, Casinos & Cruise Lines, and Global Travel Beneficiaries.

[†] The Underlying Index's natural language processing algorithm ("NLP algorithm") may not identify companies if the publicly available data for those companies have not used the key words analyzed by the algorithm. The NLP algorithm has a limited ability to recognize key words in context of relevant business exposure to travel, and the frequency of key words is not necessarily indicative of relevancy. In addition, the NLP algorithm may identify companies that may derive only a small portion of revenue or profits from travel.

Why Invest in Global Travel?

Global travel spending has outpaced global gross domestic product (GDP) for nine consecutive years between 2011 and 2019.^{††} Although COVID-19 has significantly affected global travel spending, we believe the longer-term trends indicate a potential for continued healthy growth for travel and its related ecosystem.

Compound Annual Growth Rate (CAGR): the mean annual growth rate of an investment or asset over a specified period of time longer than one year.

Important Disclosures & Definitions

An investor should consider the investment objectives, risks, charges and expenses carefully before investing. To obtain a prospectus containing this and other information, call 1-866-759-5679 or visit www.alpsfunds.com. Read the prospectus carefully before investing.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemable.

Performance data quoted represents past performance. Past performance is no guarantee of future results; current performance may be higher or lower than performance quoted.

All investments are subject to risks, including the loss of money and the possible loss of the entire principal amount invested. Additional information regarding the risks of this investment is available in the prospectus.

Diversification does not eliminate the risk of experiencing investment losses.

The Fund is subject to investment and operational risks associated with the travel industry. Companies engaged in the travel industry may be adversely affected by a downturn in economic conditions that can result in decreased demand for travel. These companies may be significantly impacted by the performance of the overall economy, changing consumer tastes and demands, consumer discretionary income levels, intense competition, technological developments, and government regulation. Additionally, uncertainty regarding international travel and other events such as political or social violence, terrorist attacks, and biological outbreaks may significantly impact the travel and vacation industry.

The Fund employs a "passive management" - or indexing - investment approach and seeks investment results that correspond (before fees and expenses) generally to the performance of its underlying index. Unlike many investment companies, the Fund is not "actively" managed. Therefore, it would not necessarily sell or buy a security unless that security is removed from or added to the underlying index, respectively.
