All investments are subject to risks, including the loss of money and the possible loss of the entire principal amount invested. Additional information regarding the risks of this investment is available in the prospectus.

Concentration in a particular industry or sector will subject the Fund to loss due to adverse occurrences that may affect that industry or sector. The Fund may use derivatives which may involve risks different from, or greater than, those associated with more traditional investments. A Fund's emphasis on dividend-paying stocks involves the risk that such stocks may fall out of favor with investors and underperform the market. Also, a company may reduce or eliminate its dividend after the Fund's purchase of such a company's securities.

Companies involved with internet technology and e-commerce are exposed to risks associated with rapid advances in technology, obsolescence of current products and services, the finite life of patents and the constant threat of global competition and substitutes.

The Fund employs a "passive management" - or indexing - investment approach and seeks investment results that correspond (before fees and expenses) generally to the performance of its underlying index. Unlike many investment companies, the Fund is not "actively" managed. Therefore, it would not necessarily sell or buy a security unless that security is removed from or added to the underlying index, respectively.

NASDAQ 100 Index: one of the world's preeminent large-cap growth indexes. It includes 100 of the largest domestic and international non-financial companies listed on the Nasdaq Stock Market based on market capitalization.

O'Shares Global Internet Giants Index: a rules-based index intended to give investors a means of tracking stocks exhibiting quality and growth characteristics in the internet technology and e-commerce business segments and pass screens for gross margin and cash burn sustainability. Companies included in OGIGX derive at least 50% of their revenues from a) internet technology companies whose principal business is to provide the technologies that support internet commerce; and b) internet commerce companies whose principal business is to sell products and services via the internet.
