Investment Objective

The ALPS | O’Shares U.S. Small-Cap Quality Dividend ETF (OUSM) is designed to provide cost efficient access to a portfolio of small-cap, high quality, low volatility, dividend paying companies in the United States selected based on fundamental metrics including:

- QUALITY
- LOW VOLATILITY
- DIVIDEND GROWTH

Why OUSM?

- **Quality Dividend Growth Stocks**: Seeks small-cap companies with strong balance sheets, profitability and dividend quality.
- **Performance**: Aims to provide strong performance with less risk than a market-cap weighted approach.
- **Reduced Risk of Yield Traps**: Emphasis on dividend quality to help avoid dividend cuts and suspensions.

Performance as of 9/30/2023

Performance data quoted represents past performance. Past performance is no guarantee of future results so that shares, when redeemed, may be worth more or less than their original cost. The investment return and principal value will fluctuate. Current performance may be higher or lower than the performance quoted. For current month-end performance call 1-866-759-5679 or visit www.alpsfunds.com.

Market Price is based on the midpoint of the bid/ask spread at 4 p.m. ET and does not represent the returns an investor would receive if shares were traded at other times.

Performance data prior to 6/21/2022 reflects the performance of the Fund as managed under the OSI ETF Trust.

1 The O’Shares U.S. Small-Cap Quality Dividend Index performance information reflects the blended performance of the FTSE USA Small Cap, Dividend Index performance information for the FTSE USA Small Cap Dividend Index and the Russell 2000 Index. The FTSE USA Small Cap Dividend Index is a capitalization-weighted index of approximately 1,500 securities in the United States with small capitalization. The Russell 2000 Index is a capitalization-weighted index of the 2,000 largest companies in the Russell 3000 Index.

2 As of 3/1/2023, the Morningstar US Small-Cap Broad Value Index replaced the Russell 2000 Index as the Fund’s secondary benchmark.

Index Description

As of September 30, 2023, the index consisted of 107 equities, with weighted average market cap of approximately $6,673 million, target index dividend yield of 2.05%, and diversified across 8 industries with largest allocations to Financials, Industrials and Consumer Discretionary.

3 Date reflects the commencement of investment operations.

4 30-Day SEC Yield: reflects the dividends and interest earned during the period, after the deduction of the Fund’s expenses.

5 As of 9/30/2023, subject to change

6 Target Index Dividend Yield: the weighted average dividend yield of the underlying constituents. Dividend Yield: a financial ratio that shows how much a company pays out in dividends each year relative to its share price.

ETF Advantages

OUSM is a passively managed fund with all of the structural benefits of an ETF.

Important Disclosures & Definitions

An investor should consider the investment objectives, risks, charges and expenses carefully before investing. This material must be preceded or accompanied by the prospectus. Read the prospectus carefully before investing.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemable.

Performance data quoted represents past performance. Past performance is no guarantee of future results; current performance may be higher or lower than performance quoted.

All investments are subject to risks, including the loss of money and the possible loss of the entire principal amount invested. Additional information regarding the risks of this investment is available in the prospectus.

Concentration in a particular industry or sector will subject the Fund to loss due to adverse occurrences that may affect that industry or sector. The Fund may use derivatives which may involve risks different from, or greater than, those associated with more traditional investments. A Fund’s emphasis on dividend-paying stocks involves the risk that such stocks may fall out of favor with investors and underperform the market. Also, a company may reduce or eliminate its dividend after the Fund’s purchase of such a company’s securities.

The securities of small capitalization companies are often more volatile and less liquid than the stocks of larger companies and may be more affected than other types of securities during market downturns. Compared to larger companies, small capitalization companies may have a shorter history of operations, and may have limited product lines, markets or financial resources.

The Fund employs a “passive management” - or indexing - investment approach and seeks investment results that correspond (before fees and expenses) generally to the performance of its underlying index. Unlike many investment companies, the Fund is not “actively” managed. Therefore, it would not necessarily sell or buy a security unless that security is removed from or added to the underlying index, respectively.

FTSE USA Small Cap ex Real Estate 2Qual/Val/Yield 3% Capped Factor Index: comprised of securities within the FTSE USA Small-Cap Index, excluding Real Estate. The index is designed to reflect the performance of three recognized equity risk factors: quality, low volatility and yield.

FTSE USA Small Cap Qual/Val/Yield 3% Capped Factor Index: designed to reflect the performance of high quality US small-cap equities exhibiting low volatility and high dividend yields. Quality is measured by profitability and leverage. Constituents are selected and weighted based on quality, volatility and yield characteristics.

Morningstar US Small-Cap Broad Value Extended Index: designed to provide comprehensive, consistent representation of the small-cap value segment of the US equity market.

O’Shares U.S. Small-Cap Quality Dividend Index: designed to reflect the performance of publicly-listed small-capitalization dividend paying issuers in the United States that meet certain market capitalization, liquidity, high quality, low volatility and dividend yield thresholds. The quality and low volatility requirements are designed to reduce exposure to high dividend equities that have experienced large price declines.

Russell 2000 Value Index: measures the performance of the small capitalization value sector of the US equity market.

One may not invest directly in an index.

ALPS Advisors, Inc. and ALPS Portfolio Solutions Distributor, Inc., affiliated entities, are unaffiliated with O’Shares Investments.
