Performance data quoted represents past performance. Past performance is no guarantee of future results so that shares, when redeemed, may be worth more or less than their original cost. The investment return and principal value will fluctuate. Current performance may be higher or lower than the performance quoted. For current month-end performance call 1-866-759-5679 or visit www.alpsfunds.com. Performance includes reinvested distributions and capital gains.

Market Price is based on the midpoint of the bid/ask spread at 4 p.m. ET and does not represent the returns an investor would receive if shares were traded at other times.

1 Fund inception date: 10/7/2013
2 Bloomberg US Aggregate Bond Index: a broad-based benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, fixed-rate agency MBS, ABS and CMBS (agency and non-agency). One may not invest directly in an index.

Important Disclosures & Definitions

An investor should consider the investment objectives, risks, charges and expenses carefully before investing. This material must be preceded or accompanied by the prospectus. Read the prospectus carefully before investing.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemable.

Performance data quoted represents past performance. Past performance is no guarantee of future results; current performance may be higher or lower than performance quoted.

All investments are subject to risks, including the loss of money and the possible loss of the entire principal amount invested. Additional information regarding the risks of this investment is available in the prospectus.

The performance of the Fund relative to its benchmark will depend largely on the decisions of the RiverFront Investment Group, LLC (the "Sub-Adviser" or "RiverFront") as to strategic asset allocation and tactical adjustments made to the asset allocation. At times, RiverFront's judgments as to the asset classes in which the Fund should invest may prove to be wrong, as some asset classes may perform worse than others or fixed income markets generally from time to time or for extended periods of time. The performance of the Fund is related to the market sectors that RiverFront may choose to emphasize or deemphasize from time to time, as well as to the individual securities selected by RiverFront within those sectors. The investment returns for particular market sectors will fluctuate and may be lower than other sectors. In addition, the individual securities chosen for investment within a particular sector may underperform other securities within that same sector. Certain bonds selected for the Fund's portfolio may decline in value more than the overall bond markets.

The value of the Fund's investments in fixed-income securities will generally decrease when interest rates rise, which means the Fund's NAV will likewise decrease. The Fund is considered nondiversified and as a result may experience greater volatility than a diversified fund.

Price Matters®, a discipline of the RiverFront Investment Group that compares inflation-adjusted current prices relative to their long-term trend to help identify extremes in valuation.
