Net Asset Value (NAV) is an exchange-traded fund's per-share value. The per-share dollar amount of the fund is derived by dividing the total value of all the securities in its portfolio, less any liabilities, by the number of fund shares outstanding. Market Price is the price at which a share can currently be traded in the market. Information detailing the number of days the Market Price of the Fund was greater than the Fund's NAV and the number of days it was less than the Fund's NAV can be obtained at www.alpsfunds.com.

* Market Price means the official closing price of a share or, if it more accurately reflects the market value of a share at the time as of which the Fund calculates current net asset value per share, the price that is the midpoint of the bid-ask spread as of that time. It does not represent the returns an investor would receive if shares were traded at other times.

† This index represents a broad measure of market performance for purposes of new regulatory requirements.

The S-Network Global Travel Index (Ticker: TRAVEL) is an Index of stocks listed on global recognized stock exchanges that are materially engaged in segments of the global travel industry, including Airlines & Airport Services; Hotels, Casinos, and Cruise Lines; Booking & Rental Agencies; and ancillary beneficiaries of global travel. Total Return assumes reinvestment of any dividends and distributions realized during a given time period. Net Total Return (NTR) is obtained by reinvesting the net dividend, which is equal to the ordinary gross dividend minus the amount of withholding tax.

The Morningstar Global Markets Index, measures the performance of the stocks located in the developed and emerging countries across the world. Stocks in the index are weighted by their float capital, which removes corporate cross ownership, government holdings and other locked-in shares.

One cannot invest directly in an index. Index performance does not reflect fund performance.

The Fund's shares are not individually redeemable. Investors buy and sell shares of the Fund on a secondary market. Only market makers or "authorized participants" may trade directly with the Fund, typically in blocks of 25,000 shares.

The ALPS Global Travel Beneficiaries ETF is not suitable for all investors. Investments in the Fund are subject to investment risks, including possible loss of the principal amount invested.
