Performance data quoted represents past performance. Past performance does not guarantee future results. Total return figures assume reinvestment of dividends and capital gains distributions, if any. The table and chart do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the sale of Fund shares. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance data may be higher or lower than actual data quoted. For the most current month-end performance data please visit [www.alpsfunds.com](http://www.alpsfunds.com) or call 1-866-759-5679.

Net Asset Value (NAV) is an exchange-traded fund's per-share value. The per-share dollar amount of the Fund is derived by dividing the total value of all the securities in its portfolio, less any liabilities, by the number of Fund shares outstanding. Market Price is the price at which a share can currently be traded in the market. Information detailing the number of days the Market Price of the Fund was greater than the Fund's NAV and the number of days it was less than the Fund's NAV can be obtained at [www.alpsfunds.com](http://www.alpsfunds.com).

\* Market Price means the official closing price of a share or, if it more accurately reflects the market value of a share at the time as of which the Fund calculates current net asset value per share, the price that is the midpoint of the bid-ask spread as of that time. It does not represent the returns an investor would receive if shares were traded at other times.

† This index represents a broad measure of market performance for purposes of new regulatory requirements.

Bloomberg U.S. Aggregate Bond Index is a broad-based benchmark that measures the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM passthroughs), ABS, and CMBS (agency and non-agency). The index is reported on a total return basis, which assumes reinvestment of any dividends and distributions realized during a given time period. The index is not actively managed and does not reflect any deductions for fees, expenses or taxes. One cannot invest directly in an index. Index performance does not reflect fund performance.

The RiverFront Dynamic Core Income ETF is not suitable for all investors. Investments in the Fund are subject to investment risks, including possible loss of the principal amount invested.

The Fund's shares are not individually redeemable. Investors buy and sell shares of the Fund on a secondary market. Only market makers or "authorized participants" may trade directly with the Fund, typically in blocks of 25,000 shares.

ALPS Portfolio Solutions Distributor, Inc., a FINRA member, is the Distributor for the RiverFront Dynamic Core Income ETF.
