

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at <https://www.alpsfunds.com/exchange-traded-funds/RFFC>. You can also get this information at no cost by calling 866.759.5679, by sending an e-mail request to info@alpsfunds.com, or by contacting your financial intermediary. The Fund's prospectus and statement of additional information, each dated March 31, 2024, along with the Fund's most recent annual report dated November 30, 2023, are incorporated by reference into this summary prospectus and may be obtained, free of charge, at the website, phone number or e-mail address noted above.

INVESTMENT OBJECTIVE

The Fund seeks to provide capital appreciation.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund ("Shares"). You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.

Annual Fund Operating Expenses (*expenses that you pay each year as a percentage of the value of your investment*)

| | |
|---|-------|
| Management Fees | 0.48% |
| Other Expenses | 0.00% |
| Total Annual Fund Operating Expenses ⁽¹⁾ | 0.48% |

⁽¹⁾ Total Annual Fund Operating Expenses have been restated to reflect current fees.

Example

The following example is intended to help you compare the cost of investing in the Fund with the costs of investing in other funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then hold or redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same each year.

| | One Year | Three Years | Five Years | Ten Years |
|--|-------------|----------------|---------------|--------------|
| Although your actual costs may be higher or lower, based on these assumptions your costs would be: | \$49 | \$154 | \$269 | \$603 |

PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the

Fund's performance. During the most recent fiscal year ended November 30, 2023, the Fund's portfolio turnover rate was 129% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

Under normal market conditions, the Fund will seek to achieve its investment objective by investing at least 80% of its net assets in a portfolio of equity securities. Equity securities include common stocks and common or preferred shares of real estate investment trusts ("REITs").

The primary decision factor in selecting the Fund's portfolio's securities is the combination of dividend-paying stocks and stocks determined to have high or improving return on invested capital ("ROIC"). In addition to considering economic factors such as the effect of interest rates on the Fund's investments, the portfolio managers typically apply a "bottom up" approach in choosing investments. Due to the nature of the securities in which the Fund invests, the Fund may have relatively high portfolio turnover compared to other funds. The portfolio managers use a disciplined sell strategy for the Fund. The portfolio managers may sell securities because of a deterioration of the underlying company's financials, such as earnings or cash flow, or because of an increase in the price of a security that would make it expensive relative to the other securities held by the Fund. Other reasons may include a change in management or control of the company, a need to raise cash or changes in the regulatory or economic environment in which the company operates. Portfolio managers can also sell any security at their discretion based on changes in expected valuation, volatility or other statistical or fundamental parameters.

The Fund may invest in small-, mid- and large-capitalization companies. The Fund will normally invest at least 75% of its net assets in securities of U.S. issuers. The Fund considers a "U.S. issuer" to be one (i) domiciled or with a principal place of business or primary securities trading market in the United States, or (ii) that derives more than 50% of its total revenues or profits from the United States. The Fund may invest substantially in companies in the financial services sector. The Fund may also invest in other exchange-traded funds ("ETFs") and/or closed-end funds which invest in equity securities.

PRINCIPAL INVESTMENT RISKS

Investors should consider the following risk factors and special considerations associated with investing in the Fund, which may cause you to lose money. The following principal risk factors have been identified for the Fund. See also the sections "Additional Information about the Fund's Principal Investment Risks" and "Additional Risk Considerations" for additional information about the Fund's risk factors.

Equity Risk. The values of equity securities, such as common stocks and preferred stock, may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, inflation (or expectations for inflation), changes in the general outlook for corporate earnings, changes in interest

or currency rates or adverse investor sentiment generally. Equity securities generally have greater price volatility than fixed-income securities.

Investment Risk. An investment in the Fund is subject to investment risk, including the possible loss of the entire principal amount that you invest.

Market Risk. Economies and financial markets throughout the world are becoming increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. The values of equity securities, such as common stocks and preferred stock, may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic, political and social conditions, inflation (or expectations for inflation), deflation (or expectations for deflation), changes in the general outlook for corporate earnings, global demand for particular products or resources, market instability, debt crises and downgrades, embargoes, tariffs, sanctions and other trade barriers, regulatory events, other governmental trade or market control programs and related geopolitical events, changes in interest or currency rates, recessions, supply chain disruptions or adverse investor sentiment generally. Equity securities generally have greater price volatility than fixed-income securities. In addition, the value of the Fund's investments may be negatively affected by the occurrence of global events such as war, terrorism, environmental disasters, natural disasters or events, country instability, and infectious disease epidemics or pandemics.

Financial Services Sector Risk. The financial services sector is subject to extensive government regulation, can be subject to relatively rapid change due to increasingly blurred distinctions between service segments, and can be significantly affected by availability and cost of capital funds, changes in interest rates, the rate of corporate and consumer debt defaults, and price competition.

Information Technology Sector Risk. Information technology companies face intense competition and potentially rapid product obsolescence. They are also heavily dependent on intellectual property rights and may be adversely affected by the loss or impairment of those rights. Companies in the information technology sector are facing increased government and regulatory scrutiny and may be subject to adverse government or regulatory action. Companies in the software industry may be adversely affected by, among other things, the decline or fluctuation of subscription renewal rates for their products and services and actual or perceived vulnerabilities in their products or services.

Real Estate Investment Risk. The Fund is subject to the risks associated with investing in real estate, which may include, but are not limited to, possible declines in the value of real estate, adverse changes in national, state or local real estate conditions; obsolescence of properties; changes in the availability, cost and terms of mortgage funds (including changes in interest rates), the impact of changes in environmental laws, overbuilding in

a real estate company's market, and environmental problems. The real estate sector is particularly sensitive to economic downturns and changes to interest rates.

REIT Investment Risk. In addition to risks related to investments in real estate generally, investing in REITs involves certain other risks related to their structure and focus, which include, but are not limited to, management risk, non-diversification risk, financing risk, cash flow dependency risk, default risk, self-liquidation risk, mortgage financing and interest rate risks, and, in many cases, relatively small market capitalization, which may result in less market liquidity and greater price volatility. REITs are also subject to the risk that the real estate market may experience an economic downturn generally, which may have a material effect on the real estate in which the REITs invest and their underlying portfolio securities. REITs are also subject to unique federal tax requirements. Dividends received by the Fund from REITs generally will not constitute qualified dividend income.

Issuer-Specific Risk. The value of an individual security or particular type of security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole.

Small- and Mid-Capitalization Company Risk. Smaller and mid-size companies often have a more limited track record, narrower markets, less liquidity, more limited managerial and financial resources and a less diversified product offering than larger, more established companies. As a result, their performance can be more volatile, which may increase the volatility of the Fund's portfolio.

Management Risk. The Fund is subject to management risk because it is an actively managed portfolio. In managing the Fund's portfolio securities, the Adviser will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results.

Fluctuation of Net Asset Value. The NAV of the Fund's Shares will generally fluctuate with changes in the market value of the Fund's holdings. The market prices of the Shares will generally fluctuate in accordance with changes in NAV as well as the relative supply of and demand for the Shares on the NYSE Arca, Inc. (the "NYSE Arca"). The Adviser cannot predict whether the Shares will trade below, at or above their NAV.

Growth Investment Risk. Growth stocks tend to be more volatile than certain other types of stocks and their prices usually fluctuate more dramatically than the overall stock market. A stock with growth characteristics can have sharp price declines due to decreases in current or expected earnings.

Liquidity Risk. The Fund may invest in equity securities that may have limited liquidity despite being listed on a securities exchange. Equity securities that are less liquid or that trade less can be more difficult or more costly to buy, or to sell, compared to other more liquid or active investments. Liquidity risk is heightened in a changing interest rate environment.

Value Investing Risk. Value securities may present risks in addition to the general risks associated with investing in securities. These securities are selected on the basis of an issuer's business and economic fundamentals or a security's current credit profile, relative to current market practice. Investing in value stocks carries the risk that the market will not recognize a stock's potential value for a long time, or that a stock judged to be undervalued may actually be appropriately valued.

Portfolio Turnover Risk. The Fund may trade all or a significant portion of the securities in its portfolio in seeking to achieve its investment objective. A high portfolio turnover rate may increase transaction costs, including brokerage commissions, on the sale of the securities and on reinvestment in other securities, which may increase the Fund's expenses. Frequent trading may also cause adverse tax consequences for investors in the Fund due to an increase in short-term capital gains.

FUND PERFORMANCE

On June 1, 2023, ALPS Advisors, Inc., the Fund's investment adviser, assumed all responsibility for selecting the Fund's investments and certain of the Fund's principal investment strategies changed. Performance figures shown below for periods before June 1, 2023 represent performance of the Fund during the times when the Fund's investments were selected by the prior sub-advisor to the Fund pursuant to the prior principal investment strategies. Consequently, the Fund's total returns shown below for the periods prior to June 1, 2023 are not necessarily indicative of the performance of the Fund, as it is currently managed. The following bar chart and table provide an indication of the risks of investing in the Fund by showing how the Fund's average annual returns for a certain time period compares with the average annual returns of the Fund's benchmark index and an index that represents a broad measure of market performance. The Fund's past performance (before and after taxes) is not necessarily an indication of how the Fund will perform in the future. Total return figures assume reinvestment of dividends and capital gains distributions and include the effect of the Fund's recurring expenses. Updated performance information is available online at www.alpsfunds.com or by calling 866.759.5679.

Annual Total Returns (calendar year ended 12/31)

Highest Quarterly Return 22.32% June 30, 2020
 Lowest Quarterly Return -25.22% March 31, 2020

The after-tax returns presented in the table below are calculated using highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax situation and may differ from those shown below. After-tax returns are not relevant to investors who hold Shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

Average Annual Total Returns

For periods ended December 31, 2023

| | 1 Year | 5 Years | Since Inception (June 6, 2016) |
|--|--------|---------|--------------------------------|
| Return Before Taxes | 19.56% | 11.70% | 10.13% |
| Return After Taxes on Distributions | 19.13% | 11.35% | 9.77% |
| Return After Taxes on Distributions and Sale of Fund Shares | 11.82% | 9.28% | 8.12% |
| S&P Composite 1500® Index* (reflects no deduction for fees, expenses or taxes) | 25.47% | 15.39% | 13.12% |
| Bloomberg US 1000 Index*† (reflects no deduction for fees, expenses or taxes) | 26.66% | 15.47% | 13.20% |

* Index performance shown in the table is the total return, which assumes reinvestment of any dividends and distributions during the time periods shown.

† This index represents a broad measure of market performance and has been added to comply with new regulatory requirements.

INVESTMENT ADVISER

ALPS Advisors, Inc. is the investment adviser to the Fund ("ALPS Advisors" or the "Adviser").

PORTFOLIO MANAGER

Laton Spahr, President of ALPS Advisors, and Eric Hewitt, Director of Research of ALPS Advisors, have been portfolio managers of the Fund since June 1, 2023.

PURCHASE AND REDEMPTION OF SHARES

Individual Shares of the Fund may only be purchased and sold in secondary market transactions through a broker or dealer at a market price. Shares of the Fund are listed for trading on NYSE Arca under the trading symbol RFFC, and because Shares will trade at market prices rather than NAV, Shares of the Fund may trade at a price greater than NAV (i.e., a premium) or less than NAV (i.e., a discount).

An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares of the Fund (bid) and the lowest price a seller is willing to accept for Shares (ask) when buying or selling Shares in the secondary market (the “bid/ask spread”).

Recent information, including information about the Fund's NAV, market price, premiums and discounts, and the bid/ask spreads, is included on the Fund's website at www.alpsfunds.com.

TAX INFORMATION

The Fund's distributions are taxable and will generally be taxed as ordinary income or capital gains.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares through a broker-dealer or other financial intermediary, the Adviser or other related companies may pay the intermediary for the sale of Shares or related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
